GT-7017-EM/EL 老化試驗機 Aging Oven

適用於測試塑料類、橡膠類、皮類、布類材料受熱前與受熱後變化特性。經規定溫度及時間均勻受熱後，觀測試樣老化前後之耐黃、開膠、收縮、伸長、殘餘率等性能，從而判定其老化特性。

The GT-7017-EM/EL is designed to determine the characteristics of materials such as plastics, rubber, leather, and fabrics after aging. This aging oven helps operators to evaluate the effects of aging on samples, including discoloration, splitting, shrinkage, and extension after exposure to specified temperature for a prescribed period of time.
